Training Academy workshop 3

Workshop CACST: Commercial Product & Installation

Workshop outline

This 1 day workshop is specifically designed to highlight and review on the installation requirements of LG's Multi systems and Multi V systems. It is suited for project managers, team leaders, and installation technicians to gain detail understanding of the product installation requirements prior to commencement of installation of the system.

The following areas are covered in this workshop:

- Overview on Multi and Multi V systems
- Installation processes and requirements
- Piping and wiring layout requirements
- Charging method and refrigerant charge calculation
- Control addressing
- Overview on network control wiring
- Basic system fault finding
- Hands-on programming on controls
- Review Test at the end of the session.

LG product range covered in this workshop include:

LG VRF Product Range:

- Multi V Plus II (Heat Pump)
- Multi V Sync II (Heat Recovery)
- Network Controls

Multi F/FDx – Multi Split Range.

Who should attend?

Authorised LG Dealers and mechanical contracting specialists including:

- Project Managers
- Team Leaders
- Installation technicians.
