

## Workshop RLCSVC: Residential Product Servicing

### Workshop outline

This workshop is specifically designed for field service technicians and team leaders to gain detail understanding of LG's split system operational logic and fault diagnostic. The following areas are covered in this workshop:

- Control logic of LG split systems; common operation logic
- Inverter operation logic and inverter board checking
- General diagnostic on split and multi split systems
- Reveal on common fault codes and check points
- Case Studies – analysing LG diagnostic software output (LGMV data), including checks for those when LGMV tool is not available
- Piping and wiring requirements for multi systems
- Refrigerant charge calculation for multi systems
- Practical exercises
- Review Test at the end of the session.

### LG product range covered in this workshop include:

- Wall Mounted Split Systems
- Ducted Split Systems
- Multi F/FDx – Multi Split Systems

Including the latest models for the range.

### Who should attend?
